Seeing the future at Verisk Vision 2022

Verisk Vision returned as an in-person event this month in London and was a great success. The packed agenda saw business leaders in insurance and technology sharing insights on more than 20 emerging InsurTech topics. We presented a vision of the future in which leading-edge technologies, AI and automation are converging to produce better, faster and more cost-effective solutions.

Spaghetti junction of APIs?

There's a better way to place risks than maintaining dozens of API connections. We're simplifying distribution with the Sequel Hub, allowing you to transact with multiple markets at the touch of a button.
