The Insurance Platform

Underwriting control, visibility, and speed - all in one place.

The Insurance Platform. A Modern, modular underwriting and policy administration built for the London specialty market. It accelerates submission to bind by managing workflows, capturing cleaner data at source, and connecting to your existing estate through APIs, so you can keep improving capability domain by domain without hitting a modernisation ceiling. Delivered in regular increments, it gives teams a strong pre bind experience today while keeping post bind operations dependable, so progress is continuous and measurable.

Why The Insurance Platform?

- ✓ Cut cycle time from submission to bind
- ✓ Modernise continuously without disruption
- ✓ Make work visible, owned, and controlled
- ✓ Connect cleanly to the tools you keep
- ✓ Deliver change fast, keep operations steady

Capabilities

VeriskStart

Features

Configurable underwriting and policy administration. Built to evolve.

The Insurance Platform gives underwriting teams a cleaner, faster path from intake to bind. It brings structure to submission handling, makes ownership and controls clear, and captures consistent data at source so downstream work is simpler and more reliable.

API enabled by design, it connects into your existing ecosystem to reduce handoffs, rekeying, and operational drag. Delivered in continuous releases, it helps you modernise capability by capability, so progress keeps compounding quarter on quarter.

What the Platform enables:

- ✓ Submission intake and triage → **Route work, prioritise, reduce churn**
- ✓ Pre bind workflow and collaboration → **Clear steps, ownership, approvals**
- ✓ Embedded AI chat and actions → **Turn market data into structured data**
- ✓ Integration ready → **Connect to existing tools and services via APIs**
- ✓ Accounting and ledger → **Financial processing with strong control**
- ✓ Market messaging and bureau processes → **Support operational compliance**
- ✓ Continuous improvement → **Practical enhancements delivered regularly**

“Great underwriting is judgement, not admin. Technology should clear the noise so your judgement can lead.”

Chris Spencer,
Director of Underwriting Solutions
Verisk SBS

Overview

Features

Capabilities

VeriskStart

Capabilities

Comprehensive capabilities for underwriting, administration, and integration

Insurance Platform supports the full underwriting lifecycle. From fast, structured pre bind flow through dependable post bind operations, with clean integration into the tools and services you already run.

Deal Flow

Structured pre-bind workflows to support efficient underwriting and quote-to-bind.

- ✓ Submission intake and triage
- ✓ Work allocation and clear ownership
- ✓ Quote to bind process support
- ✓ Embedded AI assistant

Operate

Post-bind underwriting operations covering adjustments, renewals, and portfolio control.

- ✓ Endorsements and mid-term adjustments
- ✓ Renewals and portfolio level processing
- ✓ Accounting and ledger with strong control
- ✓ Market messaging and operational compliance

Connect & Update

API-first integration and data to support automation, reporting, and ongoing change.

- ✓ API first integration across your ecosystem
- ✓ Structured data for reporting and automation
- ✓ Continuous delivery of practical improvements
- ✓ Add new capabilities without disruption

VeriskStart

VeriskStart

Packaged solutions for Lloyd's & Company Markets

VeriskStart is a packaged technology and services offering designed to reduce cost of entry and speed up market launch for specialty start ups. It combines a proven core platform, hosted and managed service, and implementation support. With optional modules added as you grow, plus start up discounts that scale over your first three years.

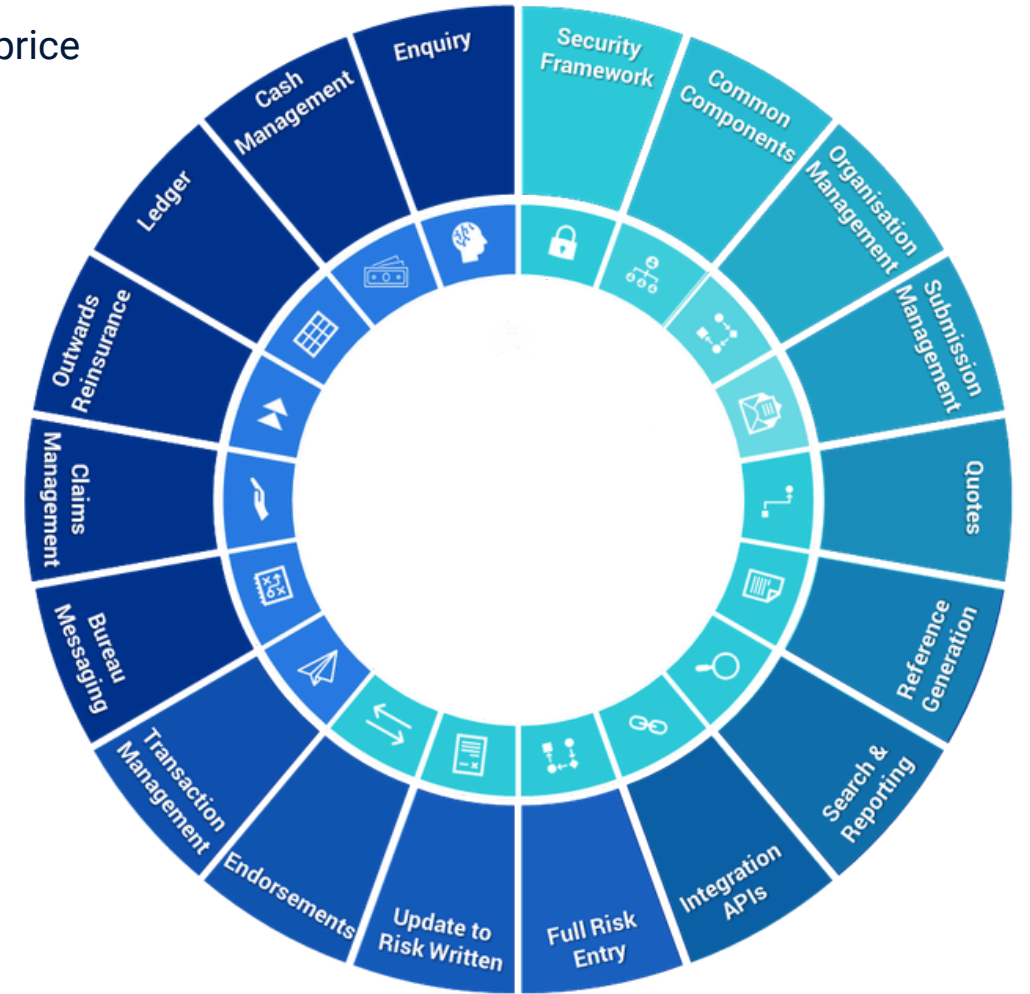

Unlike a one off build, VeriskStart gives you a repeatable route to go live. Starting with a fixed price discovery to lock requirements, roles, and delivery plan. Then a fast deployment approach supported by teams who have guided start ups into Lloyd's and the wider specialty market.

It includes:

- Foundation package with core PAS, hosted managed service, and implementation
- Optional enhanced modules added when you need them
- Start up commercial terms with flexible payment options
- Ongoing application support and releases

Benefits

-  Lower cost of entry
-  Faster speed to market
-  Scale without replatforming
-  Expert support from day one

Ready to modernise your underwriting solution?

The Insurance Platform supports the full underwriting lifecycle, from structured submission intake through dependable post-bind operations. Built for the London specialty market, it brings speed, control, and visibility to underwriting teams by managing workflows, capturing consistent data at source, and integrating seamlessly with existing systems through APIs.

Backed by Verisk's vast datasets, advanced technology, and deep industry expertise, Verisk Specialty Business Solutions is part of Verisk (NASDAQ: VRSK), a trusted data analytics and technology partner for more than 1,800 global insurance clients, including the top 100 global property/casualty providers and the top ten global reinsurers.
