

# Sequel: Rulebook Hub

Driving MGAs to better capital, bringing control  
and governance to delegated underwriting

# Sequel Rulebook Hub

A SaaS platform that connects insurers, brokers, and MGAs for streamlined distribution. Sequel Rulebook Hub is an insurer-hosted pricing solution that lets you integrate products directly with your distribution partners.

## We see how to unlock access to capital

- Bring control and governance to the delegated underwriting process, and streamline distribution
- Unlock access to previously unseen capital while saving time and reducing costs
- Quote and bind business in seconds with robust process automation
- React quickly to market conditions by managing products in real time
- Gain access to your data, providing greater visibility and control of business

## A deeper view

### Ensure compliance

- Ensure integrity and auditability of records
- Realize greater control in managing delegated authority
- Move away from reliance on risk bordereaux
- Ensure risks are priced accurately and within the terms of underwriting authority before binding

### Optimize productivity

- Increase efficiency of transacting business
- Insurer-hosted pricing solution, protecting your IP
- Rules and rates integrated directly into broker and MGA systems

### Enhanced features

- Products managed in real-time
- Protect and control product IP with the ability to persist updates in real time
- Store and manage rating models for even the most complex delegated underwriting arrangements
